

PALLETS

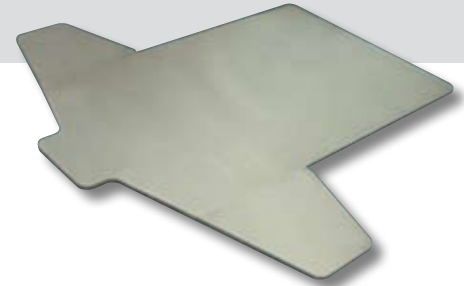

Standard Textile Pallets

M&R offers a wide range of flat textile pallets in both stock and custom sizes. Specific-use pallets include All-Over Print, Jacket Hold-Down, Single Sleeve, Vacuum, Triple Play, and Tru-Blu Ultra-Flat Pallets. All M&R pallets use high-grade aluminum tooling plate and premium components, and are built to exacting specifications. Unlike some pallets that claim to have universal application, M&R pallets work seamlessly with M&R carousel presses.

All-Over-Print (AOP) Pallets

M&R's redesigned All-Over-Print (AOP) Pallets are stronger and lighter than the ones they replace, and they eliminate the need for pallet sleeve supports. All-Over-Print (AOP) Pallets give operators oversize and all-over print capability. They're approved for use on M&R's Alpha 8, Challenger II, Challenger II OS, and Formula Automatic Textile Presses. All-Over-Print (AOP) Pallets are available in widths of 30 cm (12"), 38 cm (15"), 51 cm (20"), 58 cm (23") and 66 cm (26").

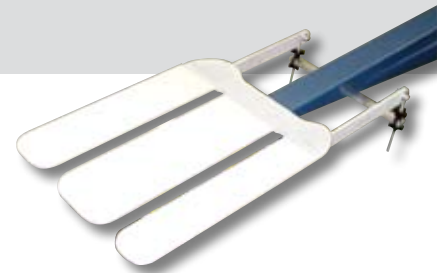

SureVac Pallets™

M&R's SureVac vacuum pallets enable textile presses to print specialized products, including transfers, poster stock, and other rigid and semi-rigid flat substrates. SureVac Pallets can be retrofit to most manual and automatic M&R carousel presses. It's the fast, easy way to maximize textile press versatility. SureVac pallets are available alone or as part of a SureVac Vacuum Pallet System, which includes a foot pedal and valve assembly that allows the operator to turn the vacuum on and off from the load station.

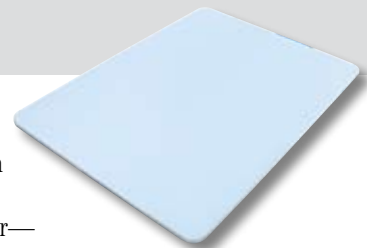

Triple Play Pallets™

M&R's patented Triple Play Pallets address a wide range of printing needs. The torsion bar support system enables outrigger-style pallets to handle heavy print loads without flexing or drooping. They also allow users to load more than one garment at a time and facilitate loading small size long sleeve shirts without interference. The sleek design and large cutouts maximize clearance when loading large or bulky garments, and the rubber-covered printing surface helps to enhance print quality. Triple Play Pallets are available in a variety of sizes and styles.

Tru-Blu Ultra-Flat Pallets™

Tru-Blu Ultra-Flat Pallets are the flattest pallets in the industry. Each Tru-Blu Pallet is guaranteed to be within +/- .0254 cm (.010") of absolute flat. That's a 50% improvement over typical pallets, which can vary +/- 0.0381 cm (.015")—or more. In the highly-competitive world of screen printing, the awarding of contracts often comes down to slight variations in quality—where Tru-Blu Ultra-Flat Pallets have the edge. Ultra-flat and exceptionally stable, Tru-Blu Pallets give printers the best possible screening surface for enhanced color registration. True blue in color—and true blue in performance—M&R's Tru-Blu Ultra-Flat Pallets set a new standard in pallet performance.
